

# IT Asset Management

In today's business environment, managing your company's IT assets and mobile devices is proving more challenging than ever. Rapid growth, constant innovation and a distributed workforce all add to the complexities IT Managers face in managing hardware assets and related software applications. Using the best-in-class Quest KACE technology, Attronica's IT Asset Management offering enables your IT organization to take back full control of the hardware landscape with **cost savings, accuracy and security**.

## KEY FEATURES

**CIO "Command Center":** Get access to critical views of the entire IT organization at all times with the customizable dashboard feature. Reduce the need for meetings and emailed reports with real-time, easy to access data.

**Cost Sharing:** Buy multi-seat licenses upfront, then share the costs across cost centers based on actual usage.

**Real-time Information:** Run queries about applications and get the answer immediately. Pay for only what you use.

**Company Focused Application "Store":** Control what applications are available to employees to ensure safety and security of your network.

**Remote Provisioning:** Deploy hardware with the proper settings without a physical presence.

**Integrate to your Business Process:** Integrate to your core systems and automate things like employee onboarding/offboarding, license approval, asset retrieval, and fixed asset depreciation.

## KEY BENEFITS

**Reduce costs** of your existing business workflow

**Manage complex IT operations** with a smaller IT/helpdesk footprint

**Reduce licensing costs** with real-time license meeting

**Reduce travel/meeting costs** with inter-department workflow processes

**Reduce complexity** of deploying new systems into the field, worldwide.

**Increase security**—instantaneous compliance reports—not days or weeks old reports (which are meaningless)

**Reduce workload** on IT managers with customized management and security policy enforcement

**Minimize IT management**, even for positions/roles with high employee turnover.

## QUICK IMPLEMENTATION

Given the significant benefits and short implementation timeline for the Quest KACE solution, most companies pass break-even in as little as four months!

PHASE 1:  
INSTALLATION

PHASE 2:  
NETWORK  
CONFIGURATION

PHASE 3:  
INTEGRATION

AS LITTLE AS 4 MONTHS
